

- Constant Power design, off-line programmable;
- Dual Mode:Constant Current and Constant Voltage;
- 4 in 1 dimming: 0(1)-10V dimming, PWM, RX, Timer dimming;
- Dim-to-Off;
- Surge protection: DM: 6KV, CM: 10KV;
- Multi-Protections: SCP/OVP/OTP/OLP;
- 12V/200mA auxiliary power optional;
- IP67;

5 years warranty.

INTRODUCTION

F1-075 series is 75W current adjustable LED intelligent led driver, which integrated dual-modes of constant voltage and constant current. Its input voltage range is 90-305VAC, with high efficiency, high power factor, high surge protection and other performance indicators. This series of products have strong compatibility, the output parameters can be offline programmable. The integrated housing meets the protection requirements of IP67 which is suitable for harsh outdoor application environment. High power density and compact size design. Multiple protection designed which including surge protection, over voltage protection, short circuit protection and over temperature protection to ensure the barrier-free operation of this product.

F1 series can be used in LED street lights, tunnel lights, shoebox lights, industrial high bay lights, horticulture lights and landscape lighting applications.

KEY PARAMETERS

Model ^[1]	Max. Power	Working	V.out	l.out Adjustable	I.out Full Power	Default Output	Typ. Efficiency ^[3]		Тур	. PF
	(W)	mode ^[2]	(Vdc)	range(A)	range(A)	Current (A/Vdc)	120Vac	230Vac	120Vac	230Vac
F1-075X-054YYY	75	C.C	27-54	1.00-2.10	1.40-2.10	1.56/48	86%	87%	0.97	0.95
F1-0/3A-034111	/5	C.V	36-56	/	0-2.10	1.56/48	86%	87%	0.97	0.95
F1-075X-115YYY	75	C.C	60-115	0.30-1.05	0.70-1.05	0.7/107	87%	88%	0.97	0.95

NOTES:

- [1] X=N, V, B or D, N=Non-dimming function,B=3-in-1 dimming function, V=I.out adjustable potentiometer, D=DALI. YYY=A12 means 12V/0.2A Auxiliary power.
- [2] The working mode can be set by offline programmer for V.out lower than 56V models. For details, see the Programmer Operation Instructions. The default factory setting is constant current working mode. [3]Unless specify noted, all performance parameters are typically measured at 25 ° c, 230Vac input, full load.

TECHNICAL DATA

Size	L133*W62*H36mm
Weight	510 ± 50 g
Package	L420mm*W270mm*H195mm 20PCS/Ctn, Gross Weight: 10.8Kg ± 10%

NOTES

- 1. It is recommended that customers install over-voltage protection and surge protection devices in the power supply circuit of lamps to ensure the safety of electricity use.
- 2. The power supply is used as a component of the whole lamp in combination with the terminal equipment. Because the EMC performance is affected by the LED lamps and wiring, the terminal equipment manufacturing, The manufacturer needs to re-confirm the EMC of the whole device.
- 3. Please use a special programmer to adjust the current of the power supply, and program and write through the dimming light.
- 4. When adjusting the output current of the power supply, please ensure that the total output power does not exceed the rated maximum power.
- 5. Unless otherwise specified, the above parameters are the test results under the conditions of ambient temperature 25 °C, humidity 50%, 100% load, and input voltage 230Vac.

DIMMING FEATURES

Dimming type	Parameter	Min.	Тур.	Max.	Remark
	Signal level	0V	-	10V(5V)	Max Voltage no more than 12Vdc(6Vdc)
0-10V(5V) ^[4] Positive	Dimming range	10%	-	100%	Percentage of Output current programmed
logic	Shutdown level	0.7V	0.8V	0.9V	
	Turn on level	0.9V	1.1V	1.35V	
10V(5V)-0	Signal level	10V(5V)	-	0V	Max Voltage no more than 12Vdc(6Vdc)
Negative	Dimming range	10%	-	100%	Percentage of Output current
logic	Shutdown level	-	-	-	
	Turn on level	0.9V	1.1V	1.35V	
	High level	9.7V	-	10.3V	
	Low level	0V	-	0.3V	
PWM	Frequency	200Hz	1KHz	2KHz	
	Duty evelo	5%	-	100%	Positive logic dimming
	Duty cycle	100%		5%	Negative logic dimming
Dimming	Resistance	10kΩ	-	100kΩ	
resistor	Dimming range	10%	-	100%	Positive logic dimming

8 400-756-9266

Note [4]: The signal amplitude is set to 10V by default, or 5V as required.

Insulation Resistance	≥10MΩ			Input-Output,Test Voltage:500Vdc
Ground Resistance	≤0.1Ω			25A/1min
Leakage Current		≤0.75mA		277Vac

NOTES:

- 1. The LED Driver itself meets with EMC standard. However, LED Driver's EMC should be re-checked when integrated into lighting systems due to unexpected interference as component.
- 2.Please short L and N, LED+ and LED-, Dim+ and Dim when Hi-pot test.
- 3. The CCC withstand voltage test needs to disconnect the built-in lightning protection tube. According to the IEC 60598-1:14 standard section 10.2, the "built-in lightning protection tube" can be marked on the nameplate to disconnect the discharge tube on testing.

Installation considerations

- 1. The lightning protection level of the power supply meets the standard requirements of IEC61000-4-5 and other countries. If it is used in lightning-prone areas or areas with relatively complex power grid environment, it is recommended to install a professional lightning protection module on the AC input end of the power supply.
- 2. Please insulate and waterproof the dimming cable when it is not in use
- 3. The voltage-withstand of LED chip and Aluminum PCB >3KV
- 4. Safety space between Aluminum PCB and LED coppers >5mm.
- 5. The safety distance between LED+ and LED- on Aluminum PCB>1.8mm
- 6. Minimize copper on Aluminum PCB to reduce junction capacitance and leakage current
- 7. LED chip is recommended to be designed in parallel first and then in series
